June 1, 2022

Debut SHF-P1 Project Concept Model at Dayton Hamvention 2022

On May 20th~22, 2022, one of the world's largest amateur radio events, "Hamvention 2022" was held at the Greene County Fairgrounds and Expo Center in Xenia, Ohio. In 2020 and 2021, it was cancelled due to Covid-19, and so it was the first time to be held in three years. Enthusiastic amateur radio operators made a long queue to wait for admission. We had high expectations of this event that was held after such a long while.

Just after the doors opened, the ICOM booth got very crowded with many amateur radio operators. The SHF-P1 concept project model got a lot of attention, from all the booth visitors. Various questions about the SHF-P1 project were asked regarding pricing, the timing of release, the frequency coverage, and other specifications. We learned that there is a high interest in the SHF-P1 project.

Future schedule

The SHF-P1 Project concept model will be displayed at following events

From 24 June 2022: HAM RADIO in Friedrichshafen Germany
